TOXICOLOGY

www.elsevier.com/locate/toxicol

Subject index of volume 209

Adults; Cadmium; Maternal milk; Gender-specific effects; Juveniles; Immune functions **209**, 289

Adverse drug reaction; Drug hypersensitivity; Alert signs; Clinical danger signs; Immediate type hypersensitivity; Delayed type hypersensitivity **209**, 201

Adverse effects; X-ray contrast media; Immediate adverse reactions; Delayed adverse reactions **209**, 185

δ-ALA-D; Aluminum; Iron; Erythrocyte; Anemia; Bone marrow **209**, 29

Albumin; Nickel; Hypersensitivity; T lymphocyte; Heat shock; Protein **209**, 101

Alert signs; Drug hypersensitivity; Adverse drug reaction; Clinical danger signs; Immediate type hypersensitivity; Delayed type hypersensitivity **209**, 201

Allergic contact dermatitis; Nickel; Regulatory T cells **209**, 119

Allergy; Drug; Hypersensitivity; Immune; Systemic; Contact; Respiratory; Animal models; Preclinical testing; Biomarkers **209**, 195

Allergy; Penicillium chrysogenum; Asthma; Respiratory exposure; Mouse model **209**, 77

Aluminum; Iron; Erythrocyte; Anemia; δ-ALA-D; Bone marrow **209**, 29

Amoxicillin; Penicillin G; IgE; Immedite hypersensitivity **209**, 181

Anaphylaxis; IgE mediated hypersensitivity; Non-IgE mediated hypersensitivity **209**, 221

Anaphylaxis; Radio contrast media; Immediate reactions; Specific IgE **209**, 193

Anemia; Aluminum; Iron; Erythrocyte; δ-ALA-D; Bone marrow **209**, 29

Animal model; Tolerance mechanism; Liver; Kupffer cells; T cells **209**, 109

Animal models; Drug; Hypersensitivity; Allergy; Immune; Systemic; Contact; Respiratory; Preclinical testing; Biomarkers **209**, 195

Animal models; Reactive metabolites; Penicillamine; Nevirapine **209**, 113

Anti-androgen effect; Endocrine; Flutamide; In utero and lactational exposure; Rat **209**, 47

Antibody response; Recombinant proteins; Erythropoietin **209**, 155

Antioxidant system; Doxorubicin; Catechin; Vitamin E; Hepatotoxicity **209**, 39

Antioxidants; Sesamol; Radioprotection; Micronuclei; Dicentric aberration; Lymphocytes; γ-Radiation; Catalase; Peroxidase **209**, 225

Apoptosis; Caffeic acid phenethyl ester (CAPE); Reactive oxygen radicals; Rat **209**, 1

Asthma; Penicillium chrysogenum; Allergy; Respiratory exposure; Mouse model **209**, 77

Atrazine; Immunomodulation; B6C3F1 mice; Cell-mediated immunity; B16F10 melanoma **209**, 15

Autoimmunity; Systemic lupus erythematosus; T cells; Thymus function; Oxidative drug metabolism **209**, 135

B6C3F1 mice; Atrazine; Immunomodulation; Cell-mediated immunity; B16F10 melanoma **209**, 15

doi:10.1016/S0300-483X(05)00122-8

Benzene; Benzoquinone; HL-60; ERK/MAPK; ROS; Leukemia **209**, 279

Benzoquinone; Benzene; HL-60; ERK/MAPK; ROS; Leukemia **209**, 279

Beta-lactam antibiotics; Quinolones; Radio contrast media; IgE; T cells; Cross-reactivity; Drugs; Hypersensitivity reactions **209**, 169

B16F10 melanoma; Atrazine; Immunomodulation; B6C3F1 mice; Cell-mediated immunity **209**, 15

Biomarkers; Drug; Hypersensitivity; Allergy; Immune; Systemic; Contact; Respiratory; Animal models; Preclinical testing **209**, 195

Bone marrow; Aluminum; Iron; Erythrocyte; Anemia; δ-ALA-D **209**, 29

Cadmium; Maternal milk; Gender-specific effects; Adults; Juveniles; Immune functions **209**, 289

Caffeic acid phenethyl ester (CAPE); Apoptosis; Reactive oxygen radicals; Rat **209**, 1

Carbon monoxide; Haem oxygenase; Nitric oxide synthetase; Hypoxaemia **209**, 237

Catalase; Sesamol; Radioprotection; Micronuclei; Dicentric aberration; Antioxidants; Lymphocytes; γ-Radiation; Peroxidase **209**, 225

Catechin; Doxorubicin; Vitamin E; Hepatotoxicity; Antioxidant system **209**, 39

CD122; Drug-induced hypersensitivity syndrome; NK cell; γδ-T cell; Human herpesvirus 6 **209**, 161

Cell-mediated immunity; Atrazine; Immunomodulation; B6C3F1 mice; B16F10 melanoma **209**, 15

Cerebellum; Gestational; Glial fibrillary acidic protein; Hippocampus; Infusion; Maternal; Mini osmotic pump; Neurotoxicity; Nicotine; Nicotinic acetylcholine receptor; Offspring; Smoking **209**, 245

Classification; Contrast media hypersensitivity; Incidence; Pathomechanism; Diagnosis; Prophylaxis **209**, 189

Clinical danger signs; Drug hypersensitivity; Adverse drug reaction; Alert signs; Immediate type hypersensitivity; Delayed type hypersensitivity **209**, 201

Comparative toxicity; *para*-Aminophenol; Hepatocytes; Renal epithelial cells **209**, 69

Contact; Drug; Hypersensitivity; Allergy; Immune; Systemic; Respiratory; Animal models; Preclinical testing; Biomarkers **209**, 195

Contrast media hypersensitivity; Classification; Incidence; Pathomechanism; Diagnosis; Prophylaxis **209**, 189

Cross-reactivity; Beta-lactam antibiotics; Quinolones; Radio contrast media; IgE; T cells; Drugs; Hypersensitivity reactions **209**, 169

Cross-reactivity; Drug hypersensitivity; p-i concept; T-cell receptor; T-cells **209**, 95

Cutaneous adverse drug reaction; Drug allergy; Drug patch test **209**, 209

Cytokines; Maculo-papular exanthem; T cells; Cytotoxicity **209**, 131

Cytotoxicity; Maculo-papular exanthem; T cells; Cytokines **209**, 131

Cytotoxicity; Trichloroethylene; Perchloroethylene; Normal human epidermal keratinocytes; Vitamin E **209**, 55

Delayed adverse reactions; X-ray contrast media; Adverse effects; Immediate adverse reactions **209**, 185

Delayed type hypersensitivity; Drug hypersensitivity; Adverse drug reaction; Alert signs; Clinical danger signs; Immediate type hypersensitivity **209**, 201

Diagnosis; Contrast media hypersensitivity; Classification; Incidence; Pathomechanism; Prophylaxis **209**, 189

Dicentric aberration; Sesamol; Radioprotection; Micronuclei; Antioxidants; Lymphocytes; γ-Radiation; Catalase; Peroxidase **209**, 225

Doxorubicin; Catechin; Vitamin E; Hepatotoxicity; Antioxidant system **209**, 39

DRESS; Exanthema; Stevens-Johnson syndrome; Toxic epidermal necrolisis; Fas-L and Perforin killing **209**, 123

Drug allergy; Cutaneous adverse drug reaction; Drug patch test **209**, 209

Drug allergy; Lymphocyte transformation test; Interleukin-5; Interferons; Drug metabolism **209**, 217

Drug hypersensitivity; Adverse drug reaction; Alert signs; Clinical danger signs; Immediate type hypersensitivity; Delayed type hypersensitivity **209**, 201

Drug hypersensitivity; p-i concept; T-cell receptor; T-cells; Cross-reactivity **209**, 95

Drug metabolism; Lymphocyte transformation test; Drug allergy; Interleukin-5; Interferons **209**, 217

Drug patch test; Drug allergy; Cutaneous adverse drug reaction **209**, 209

Drug; Hypersensitivity; Allergy; Immune; Systemic; Contact; Respiratory; Animal models; Preclinical testing; Biomarkers **209**, 195

Drug-induced hypersensitivity syndrome; Human herpesvirus 6; Virus reactivation; Intravenous immunoglobulin **209**, 165

Drug-induced hypersensitivity syndrome; NK cell; γδ-T cell; CD122; Human herpesvirus 6 **209**, 161

Drug-induced thrombocytopenia; Immune thrombocytopenia **209**, 149

Drugs; Beta-lactam antibiotics; Quinolones; Radio contrast media; IgE; T cells; Cross-reactivity; Hypersensitivity reactions **209**, 169

Endocrine; Anti-androgen effect; Flutamide; In utero and lactational exposure; Rat **209**, 47

ERK/MAPK; Benzene; Benzoquinone; HL-60; ROS; Leukemia **209**, 279

Erythrocyte; Aluminum; Iron; Anemia; δ-ALA-D; Bone marrow **209**, 29

Erythropoietin; Recombinant proteins; Antibody response **209**, 155

Exanthema; Stevens-Johnson syndrome; Toxic epidermal necrolisis; Fas-L and Perforin killing; DRESS **209**, 123

Fas-L and Perforin killing; Exanthema; Stevens-Johnson syndrome; Toxic epidermal necrolisis; DRESS **209**, 123

Flutamide; Anti-androgen effect; Endocrine; In utero and lactational exposure; Rat **209**, 47

Gender-specific effects; Cadmium; Maternal milk; Adults; Juveniles; Immune functions **209**, 289

Gestational; Cerebellum; Glial fibrillary acidic protein; Hippocampus; Infusion; Maternal; Mini osmotic pump; Neurotoxicity; Nicotine; Nicotinic acetylcholine receptor; Offspring; Smoking **209**, 245

Glial fibrillary acidic protein; Cerebellum; Gestational; Hippocampus; Infusion; Maternal; Mini osmotic pump; Neurotoxicity; Nicotine; Nicotinic acetylcholine receptor; Offspring; Smoking **209**, 245

Haem oxygenase; Carbon monoxide; Nitric oxide synthetase; Hypoxaemia **209**, 237

Heat shock; Nickel; Hypersensitivity; T lymphocyte; Albumin; Protein **209**, 101

Hepatocytes; *para*-Aminophenol; Renal epithelial cells; Comparative toxicity **209**, 69

Hepatotoxicity; Doxorubicin; Catechin; Vitamin E; Antioxidant system **209**, 39

Hippocampus; Cerebellum; Gestational; Glial fibrillary acidic protein; Infusion; Maternal; Mini osmotic pump; Neurotoxicity; Nicotine; Nicotinic acetylcholine receptor; Offspring; Smoking **209**, 245

HL-60; Benzene; Benzoquinone; ERK/MAPK; ROS; Leukemia **209**, 279

Human herpesvirus 6; Drug-induced hypersensitivity syndrome; NK cell; γδ-T cell; CD122 **209**, 161

Human herpesvirus 6; Drug-induced hypersensitivity syndrome; Virus reactivation; Intravenous immunoglobulin **209**, 165

Human natural killer cells; Tributyltin-induced effects; MAP kinases p38 and p44/42 **209**, 263

Hypersensitivity reactions; Beta-lactam antibiotics; Quinolones; Radio contrast media; IgE; T cells; Cross-reactivity; Drugs **209**, 169

Hypersensitivity; Drug; Allergy; Immune; Systemic; Contact; Respiratory; Animal models; Preclinical testing; Biomarkers **209**, 195

Hypersensitivity; Nickel; T lymphocyte; Albumin; Heat shock; Protein **209**, 101

Hypoxaemia; Carbon monoxide; Haem oxygenase; Nitric oxide synthetase **209**, 237

IgE mediated hypersensitivity; Anaphylaxis; Non-IgE mediated hypersensitivity **209**, 221

IgE; Beta-lactam antibiotics; Quinolones; Radio contrast media; T cells; Cross-reactivity; Drugs; Hypersensitivity reactions **209**, 169

IgE; Penicillin G; Amoxicillin; Immedite hypersensitivity **209**, 181

Immediate adverse reactions; X-ray contrast media; Adverse effects; Delayed adverse reactions **209**, 185

Immediate reactions; Radio contrast media; Anaphylaxis; Specific IgE **209**, 193

Immediate type hypersensitivity; Drug hypersensitivity; Adverse drug reaction; Alert signs; Clinical danger signs; Delayed type hypersensitivity **209**, 201

Immedite hypersensitivity; Penicillin G; Amoxicillin; IgE **209**, 181

Immune functions; Cadmium; Maternal milk; Gender-specific effects; Adults; Juveniles **209**, 289

Immune thrombocytopenia; Drug-induced thrombocytopenia **209**, 149

Immune; Drug; Hypersensitivity; Allergy; Systemic; Contact; Respiratory; Animal models; Preclinical testing; Biomarkers **209**, 195

Immunomodulation; Atrazine; B6C3F1 mice; Cell-mediated immunity; B16F10 melanoma **209**, 15

In utero and lactational exposure; Anti-androgen effect; Endocrine; Flutamide; Rat **209**, 47

Incidence; Contrast media hypersensitivity; Classification; Pathomechanism; Diagnosis; Prophylaxis **209**, 189

Infusion; Cerebellum; Gestational; Glial fibrillary acidic protein; Hippocampus; Maternal; Mini osmotic pump; Neurotoxicity; Nicotine; Nicotinic acetylcholine receptor; Offspring; Smoking **209**, 245

Interferons; Lymphocyte transformation test; Drug allergy; Interleukin-5; Drug metabolism **209**, 217

Interleukin-5; Lymphocyte transformation test; Drug allergy; Interferons; Drug metabolism **209**, 217

Intravenous immunoglobulin; Drug-induced hypersensitivity syndrome; Human herpesvirus 6; Virus reactivation **209**, 165

Iron; Aluminum; Erythrocyte; Anemia; δ-ALA-D; Bone marrow **209**, 29

Juveniles; Cadmium; Maternal milk; Gender-specific effects; Adults; Immune functions **209**, 289

Kupffer cells; Tolerance mechanism; Liver; T cells; Animal model **209**, 109

Leukemia; Benzene; Benzoquinone; HL-60; ERK/MAPK; ROS **209**, 279

Liver; Tolerance mechanism; Kupffer cells; T cells; Animal model **209**, 109

Lymphocyte transformation test; Drug allergy; Interleukin-5; Interferons; Drug metabolism **209**, 217

Lymphocytes; Sesamol; Radioprotection; Micronuclei; Dicentric aberration; Antioxidants; γ-Radiation; Catalase; Peroxidase **209**, 225

Maculo-papular exanthem; T cells; Cytotoxicity; Cytokines **209**, 131

MAP kinases p38 and p44/42; Tributyltin-induced effects; Human natural killer cells **209**, 263

Maternal milk; Cadmium; Gender-specific effects; Adults; Juveniles; Immune functions **209**, 289

Maternal; Cerebellum; Gestational; Glial fibrillary acidic protein; Hippocampus; Infusion; Mini osmotic pump; Neurotoxicity; Nicotine; Nicotinic acetylcholine receptor; Offspring; Smoking **209**, 245

Micronuclei; Sesamol; Radioprotection; Dicentric aberration; Antioxidants; Lymphocytes; γ-Radiation; Catalase; Peroxidase **209**, 225

Mini osmotic pump; Cerebellum; Gestational; Glial fibrillary acidic protein; Hippocampus; Infusion; Maternal; Neurotoxicity; Nicotine; Nicotinic acetylcholine receptor; Offspring; Smoking **209**, 245

Mouse model; Penicillium chrysogenum; Allergy; Asthma; Respiratory exposure **209**, 77

Neurotoxicity; Cerebellum; Gestational; Glial fibrillary acidic protein; Hippocampus; Infusion; Maternal; Mini osmotic pump; Nicotine; Nicotinic acetylcholine receptor; Offspring; Smoking **209**, 245

Nevirapine; Reactive metabolites; Penicillamine; Animal models **209**, 113

Nickel; Allergic contact dermatitis; Regulatory T cells **209**, 119

Nickel; Hypersensitivity; T lymphocyte; Albumin; Heat shock; Protein **209**, 101

Nicotine; Cerebellum; Gestational; Glial fibrillary acidic protein; Hippocampus; Infusion; Maternal; Mini osmotic pump; Neurotoxicity; Nicotinic acetylcholine receptor; Offspring; Smoking **209**, 245

Nicotinic acetylcholine receptor; Cerebellum; Gestational; Glial fibrillary acidic protein; Hippocampus; Infusion; Maternal; Mini osmotic pump; Neurotoxicity; Nicotine; Offspring; Smoking **209**, 245

Nitric oxide synthetase; Carbon monoxide; Haem oxygenase; Hypoxaemia **209**, 237

NK cell; Drug-induced hypersensitivity syndrome; γδ-T cell; CD122; Human herpesvirus 6 **209**, 161

Non-IgE mediated hypersensitivity; Anaphylaxis; IgE mediated hypersensitivity **209**, 221

Normal human epidermal keratinocytes; Trichloroethylene; Perchloroethylene; Cytotoxicity; Vitamin E **209**, 55

Offspring; Cerebellum; Gestational; Glial fibrillary acidic protein; Hippocampus; Infusion; Maternal; Mini osmotic pump; Neurotoxicity; Nicotine; Nicotinic acetylcholine receptor; Smoking **209**, 245

Oxidative drug metabolism; Autoimmunity; Systemic lupus erythematosus; T cells; Thymus function **209**, 135

***para*-Aminophenol**; Hepatocytes; Renal epithelial cells; Comparative toxicity **209**, 69

Pathomechanism; Contrast media hypersensitivity; Classification; Incidence; Diagnosis; Prophylaxis **209**, 189

Penicillamine; Reactive metabolites; Nevirapine; Animal models **209**, 113

Penicillin G; Amoxicillin; IgE; Immedite hypersensitivity **209**, 181

Penicillium chrysogenum; Allergy; Asthma; Respiratory exposure; Mouse model **209**, 77

Perchloroethylene; Trichloroethylene; Cytotoxicity; Normal human epidermal keratinocytes; Vitamin E **209**, 55

Peroxidase; Sesamol; Radioprotection; Micronuclei; Dicentric aberration; Antioxidants; Lymphocytes; γ-Radiation; Catalase **209**, 225

p-i concept; Drug hypersensitivity; T-cell receptor; T-cells; Cross-reactivity **209**, 95

Preclinical testing; Drug; Hypersensitivity; Allergy; Immune; Systemic; Contact; Respiratory; Animal models; Biomarkers **209**, 195

Prophylaxis; Contrast media hypersensitivity; Classification; Incidence; Pathomechanism; Diagnosis **209**, 189

Protein; Nickel; Hypersensitivity; T lymphocyte; Albumin; Heat shock **209**, 101

Quinolones; Beta-lactam antibiotics; Radio contrast media; IgE; T cells; Cross-reactivity; Drugs; Hypersensitivity reactions **209**, 169

γ-Radiation; Sesamol; Radioprotection; Micronuclei; Dicentric aberration; Antioxidants; Lymphocytes; Catalase; Peroxidase **209**, 225

Radio contrast media; Beta-lactam antibiotics; Quinolones; IgE; T cells; Cross-reactivity; Drugs; Hypersensitivity reactions **209**, 169

Radio contrast media; Immediate reactions; Anaphylaxis; Specific IgE **209**, 193

Radioprotection; Sesamol; Micronuclei; Dicentric aberration; Antioxidants; Lymphocytes; γ-Radiation; Catalase; Peroxidase **209**, 225

Rat; Anti-androgen effect; Endocrine; Flutamide; In utero and lactational exposure **209**, 47

Rat; Apoptosis; Caffeic acid phenethyl ester (CAPE); Reactive oxygen radicals **209**, 1

Reactive metabolites; Penicillamine; Nevirapine; Animal models **209**, 113

Reactive oxygen radicals; Apoptosis; Caffeic acid phenethyl ester (CAPE); Rat **209**, 1

Recombinant proteins; Erythropoietin; Antibody response **209**, 155

Regulatory T cells; Allergic contact dermatitis; Nickel **209**, 119

Renal epithelial cells; *para*-Aminophenol; Hepatocytes; Comparative toxicity **209**, 69

Respiratory exposure; Penicillium chrysogenum; Allergy; Asthma; Mouse model **209**, 77

Respiratory; Drug; Hypersensitivity; Allergy; Immune; Systemic; Contact; Animal models; Preclinical testing; Biomarkers **209**, 195

ROS; Benzene; Benzoquinone; HL-60; ERK/MAPK; Leukemia **209**, 279

Sesamol; Radioprotection; Micronuclei; Dicentric aberration; Antioxidants; Lymphocytes; γ-Radiation; Catalase; Peroxidase **209**, 225

Smoking; Cerebellum; Gestational; Glial fibrillary acidic protein; Hippocampus; Infusion; Maternal; Mini osmotic pump; Neurotoxicity; Nicotine; Nicotinic acetylcholine receptor; Offspring **209**, 245

Specific IgE; Radio contrast media; Immediate reactions; Anaphylaxis **209**, 193

Stevens-Johnson syndrome; Exanthema; Toxic epidermal necrolisis; Fas-L and Perforin killing; DRESS **209**, 123

Systemic lupus erythematosus; Autoimmunity; T cells; Thymus function; Oxidative drug metabolism **209**, 135

Systemic; Drug; Hypersensitivity; Allergy; Immune; Contact; Respiratory; Animal models; Preclinical testing; Biomarkers **209**, 195

γδ-T cell; Drug-induced hypersensitivity syndrome; NK cell; CD122; Human herpesvirus 6 **209**, 161

T cells; Autoimmunity; Systemic lupus erythematosus; Thymus function; Oxidative drug metabolism **209**, 135

T cells; Beta-lactam antibiotics; Quinolones; Radio contrast media; IgE; Cross-reactivity; Drugs; Hypersensitivity reactions **209**, 169

T cells; Maculo-papular exanthem; Cytotoxicity; Cytokines **209**, 131

T cells; Tolerance mechanism; Liver; Kupffer cells; Animal model **209**, 109

T lymphocyte; Nickel; Hypersensitivity; Albumin; Heat shock; Protein **209**, 101

T-cell receptor; Drug hypersensitivity; p-i concept; T-cells; Cross-reactivity **209**, 95

T-cells; Drug hypersensitivity; p-i concept; T-cell receptor; Cross-reactivity **209**, 95

Thymus function; Autoimmunity; Systemic lupus erythematosus; T cells; Oxidative drug metabolism **209**, 135

Tolerance mechanism; Liver; Kupffer cells; T cells; Animal model **209**, 109

Toxic epidermal necrolisis; Exanthema; Stevens-Johnson syndrome; Fas-L and Perforin killing; DRESS **209**, 123

Tributyltin-induced effects; MAP kinases p38 and p44/42; Human natural killer cells **209**, 263

Trichloroethylene; Perchloroethylene; Cytotoxicity; Normal human epidermal keratinocytes; Vitamin E **209**, 55

Virus reactivation; Drug-induced hypersensitivity syndrome; Human herpesvirus 6; Intravenous immunoglobulin **209**, 165

Vitamin E; Doxorubicin; Catechin; Hepatotoxicity; Antioxidant system **209**, 39

Vitamin E; Trichloroethylene; Perchloroethylene; Cytotoxicity; Normal human epidermal keratinocytes **209**, 55

X-ray contrast media; Adverse effects; Immediate adverse reactions; Delayed adverse reactions **209**, 185
